CLARITEE GROUP
Healthcare Data Analysts

Understanding and effectively using data is now a requirement for every healthcare organization to succeed in a fee-for-value reimbursement world. Every aspect of your organization, from revenue cycle to physician compensation to patient care, is affected by your ability to harness the power of data.

If you are like most providers, you have all of the data needed to make effective decisions, but it is inaccessible as it resides in an array of disparate systems, formats and locations. Whether it's payroll costs, head count, claim denials or clinical encounters, extracting data and organizing it into the optimal form for decision making is a time-consuming task. Claritee solves this problem, seamlessly, economically and without tying up your IT and administrative staff. We help shift your organization's focus away from <u>gathering</u> and <u>compiling</u> to <u>interpreting</u> and <u>transforming</u> data into informed decision-making.

The Claritee Difference

Claritee offers providers software and services that improve their analytical capabilities. Claritee is the proven leader in healthcare analytics, offering many high-value benefits, including the following:

- We are dedicated to helping our clients become data-driven organizations. We know data because we are analysts first, with deep experiences and a passion for helping providers improve outcomes.

- We work side by side with our clients to help them improve their analytical skills. An experienced analyst will be assigned to your organization to share best practices and personally educate your team. You are never alone when you partner with Claritee.

- We provide you with a dedicated, stand-alone analytics platform, which is installed on premise within your organization, so you control the data. The application automatically extracts and organizes your disparate data into valuable KPIs. Claritee provides complete management and support services so you have minimal IT resource requirements.

- We have plug-ins to all of the leading practice management, electronic medical records and accounting applications. Implementation is straightforward and can be completed within several weeks.

- Analytical information is presented through a user-friendly Excel and web interface, so the learning curve is easy for your data analysts and information consumers.

- Minimum capital commitment is necessary, with an <u>easy-out clause</u> if Claritee does not deliver the desired value.

Claritee has helped many providers improve their reimbursements, lower costs and remain in compliance through an effective approach to data liberation.
